Berlin, 19.02.2013

Dear Sir or Madam,

As the enclosed information indicates, the Charité Medical School Berlin in Germany offers an international master's program in molecular medicine. This two-year program is tuition-free and is conducted in English. It begins each year in October and is ideally suited for students, who have obtained a bachelor's degree in a natural science or related field, or students who have completed, or partially completed, medical school. We would most appreciate it if you could post the enclosed poster in an appropriate location and distribute the flyers to inform students about this program. For further information, please look at our website – [www.molecular-medicine-berlin.com](http://www.molecular-medicine-berlin.com).

Many thanks,

Sincerely,

Naomi Weizenbaum  
Program Coordinator
